

Horizontal Tray

CODE **GW295**

LEADED TRAYS ARE AVAILABLE
IN EITHER :-

	CODE 4	CODE 5
SHORT LEAD	75mm DROP	
STANDARD LEAD	150mm DROP	150 mm DROP
LONG LEAD	300mm DROP	350mm DROP

Description:

The GW295 Horizontal Tray is designed for straight horizontal abutments in new build situations. Integral stop ends and a hook feature removes the need for overlap of trays giving a total tray effective length of 900mm.

The tray has unique front mortar clips that can be easily removed once the mortar has set leaving a 25mm deep aperture into which the lead is inserted and secure with lead wedges.

Two G950 Weep Vents or G953 Diamond Weeps must be used in conjunction with this tray spaced at 450mm centres to meet current NHBC standards to drain away the collected water.

The GW295 Horizontal Tray can also be supplied with short, standard or long lead stapled and sealed to the tray in either code 4 or code 5 (special order).

COLOURS	Black
