

Cross Flow Eaves Panel Ventilator

CODE **G400**

Description:

The G400 Cross Flow Eaves Panel is designed to provide a clear air gap between the roof felt and loft insulation into the roof space.

The G400 Cross Flow Eaves Panel is suitable for 400mm rafter centres 450mm and 600mm versions are also available.

Fitting Instructions:

The G400 Cross Flow Eaves Panel (A) should be positioned with its lower edge over lapping the wall plate and either nailed or stapled through the side fixing wings to the rafters ensuring that the loft insulation is firmly tucked into the eaves and around the wall plate as shown.

In certain low pitch situations two Cross Flow Eaves Panels will be required to ensure a clear air path over the insulation into the roof space.

Use in conjunction with other products from the Manthorpe range to provide a complete roof ventilation system.
