

Long Block / Stonework Intermediate Tray Left Hand

CODE **GW292 LBS**

MORTAR CLIP NOT SHOWN

Description:

The GW292 LBS Long Left Hand Intermediate Tray suits low pitches in typically 150mm, 225mm coursing in either stonework or blockwork and has an upstand at one end only. This is so that the water can run out of the tray down the cavity tray system.

The flexible perpend protector attached to the tray prevents driving rain penetrating the outer wall and tracking across the masonry.

The tray has a unique front mortar clip that can be removed at any time once the mortar has set leaving a 25mm deep aperture into which the lead is inserted into and secured with lead wedges.

The GW292 LBS Long Left Hand Intermediate Tray can also be supplied with short or long lead securely attached with staples in either code 4 or code 5 (special order) lead.

Note: - When ordering trays please state roof pitch, course, and height and whether short or long lead is required.
