

Roll-Out Dry Ridge System - 6m Vent Roll

CODE **GDRR-RR**

Description

Supplied in lengths of 6 metres, the Ridge Roll is placed along the length of the ridge prior to the ridge tiles being installed.

The roll is made up of a ventilated membrane with a corrugated aluminium flashing down each edge.

The malleability of the aluminium allows the roll to be shaped to the profile of the roof tiles and is secured in place with a butyl strip already attached to the underside.

When installing, the protective cover must be removed to expose the tacky butyl, which will adhere to the surface of the roof covering when firmly pressed down.

The perforated membrane is designed to provide 5,000mm²/m ventilation, which is the equivalent to a continuous 5mm gap along the ridge.

The Ridge Roll forms part of Manthorpe's Dry Ridge System which can be purchased as a kit, with all the parts required to cover a run of approximately 6 metres.

Independently tested to conform with the requirements of BS 8612.

Product Codes:

6m Vent Roll

GDRR-RR

Fixing:

Weight	1.070 kg
Materials	Vented Membrane with an Aluminium Flashing
Manufacturing Process	Pressed & Fabricated
Colour Variations	Black (BL) Dark Brown (BR)
