

450mm Access Panel

CODE GL450

Installation:

To install, prepare a slightly oversized 450mm square hole in the dry-line material in front of the detail you wish to access. Run a bead of a suitable adhesive all around the backside of the frame. With the door securely fastened within the frame, insert the whole panel into the previously prepared hole and press firmly against the surface of the wall. Remove any excess adhesive which has seeped from behind the frame and leave to set.

Description:

The GL450 Access Panel provides a cost effective solution for easy access to hidden building services behind a ceiling or wall. The panel is predominantly used in domestic household situations for access to:-

- Electrical Wiring Systems
- Fuse Boxes / Switches
- Controls / Connection Links
- Valves / Stopcocks / Plumbing

The product is hinged along one side, lightweight, easy to fit and is manufactured in UV stable high impact textured plastic, suitable for painting.

PACKING DETAILS	Packed in boxes of 10 items
