

Rafter Foot

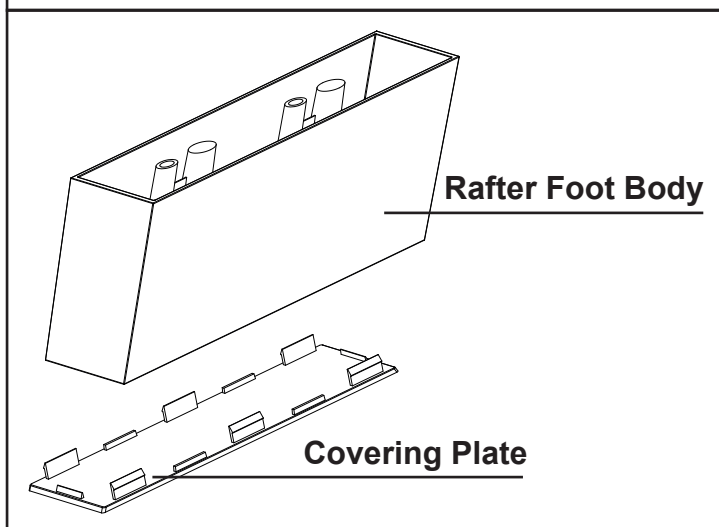

CODE G750

Description

The Manthorpe Rafter Foot has been designed to create a mock open eaves detail, when a closed eaves construction with a sloping soffit board is required. Its versatile design allows for the installer to fix the product either from above the soffit board or from below, depending on the installers preference. Each Rafter Foot is fixed against the soffit board via a secure mechanical fixing (Please see fitting instructions for further details).
