

Airbrick

Code: **G930**

<b>Colour Options</b>	Terracotta, Buff, Brown, Blue/Black, White, Grey
<b>Packing Details</b>	20 per box
<b>Weight</b>	0.12 kg per part. 2.3 kg per box.
<b>Material</b>	Polypropylene
<b>Manufacturing Process</b>	Injection Moulded
<b>Free Area</b>	6,450 mm <sup>2</sup>

**Description**

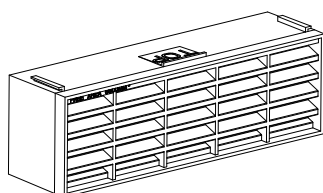

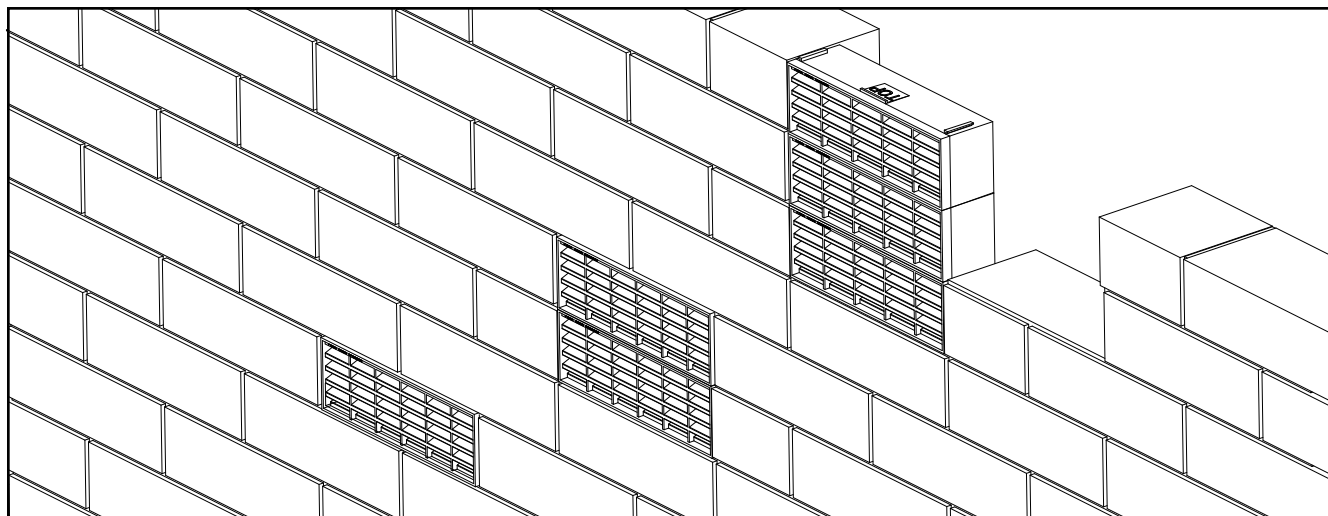

The G930 Airbrick has been designed to provide high levels of ventilation through cavity wall constructions, ventilating into the building or below it into the underfloor void. The airbrick incorporates a grill which consists of evenly spaced openings specifically sized to prohibit large insects gaining access but wide enough not to be blocked by debris or water droplets.

A mortar key around the outside of the airbrick ensures secure adhesion to the building fabric. While the joining clips enable multiple units to be stacked together to provide a choice of ventilation sizes.

Airbrick

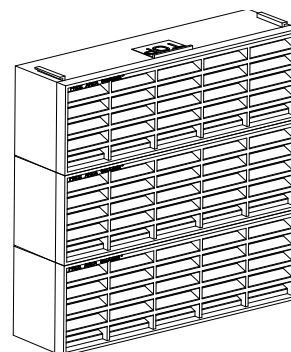

Code: **G930**

9"x3"

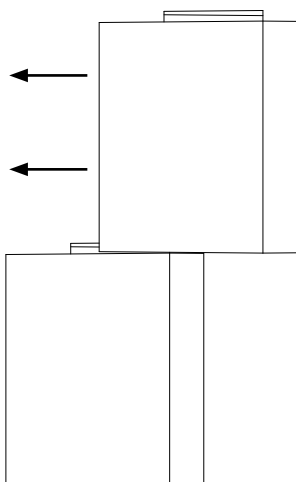

9"x6"

9"x9"

Slide G930 on top of another G930 to stack.

### Fitting Instructions

The G930 Airbrick should be built into the brick course as per normal practice although care should be taken to keep the airflow passage clear from mortar droppings.

The G930 Airbrick is to be used in conjunction with other products from the Manthorpe 'Through Wall & Underfloor' range to provide a complete wall ventilation system. If the cavity has been bridged a suitable cavity tray should be fitted over the airbrick if above the D.P.C.
