

Combination Cavity Sleeve

Code: **G935**

Each G935 assembly consists of 2 identical parts

Colour	Black
Packing Details	10 per box
Weight	0.42 kg per part. 4.6 kg per box.
Material	High Impact Polystyrene
Manufacturing Process	Injection Moulded
Free Area	6,450 mm ² with G930 airbrick (6,600 mm ² G935 only)

Description

The G935 Cavity Sleeve is designed to fit to the back of a G930 Airbrick to provide through wall ventilation horizontally across the cavity. As with the G930 airbrick it can be stacked to form 9" x 6" or 9" x 9" formations.

A telescopic ability enables the G935 to adjust to fit cavity widths of 50mm to 100mm. Further horizontal extension is possible with the addition of extra units.

Please note this is a not a structural load bearing product. Drawings are illustrative only.
