

Hip End Closer

Code: **GDRH-HC**

Features

- Fits to all major angled or round standard hip tiles, no need for bespoke hip end tiles
- Removes the need for mortar when using dry fix roofing systems.
- Easy to fit into a standard hip tile.
- Lightweight & mechanically fixed.
- Available in black, terracotta, brown or buff.

Description

Part of the Manthorpe dry fix roofing range, the Hip End Closer is a cost effective dry fix alternative to mortaring in the end of a roll-out hip system, without resorting to expensive block end hip tiles.

The flexible front face allows the product to conform to any of the market leading hip tiles, providing a neat closing solution to the end of the hip roof without having to mix up a small amount of mortar for an otherwise completely dry fix system.

Part Weight	0.09 kg
Box Qty	10
Material	Polypropylene
Colours (front filler)	Black, Buff, Terracotta, Brown
